

FOR IMMEDIATE RELEASE

IBASE and Acer Cloud Technology Partner to Provide Smart Digital Signage Systems with Being Device Management Platform

Taipei, Taiwan, February 4, 2019 - IBASE Technology Inc. (TPEX: 8050), a leading manufacturer of digital signage player and Acer Cloud Technology have partnered to deliver digital signage solutions with Being Device Management (BDM) to address the growing need for device management in IoT integrated systems.

The synergy of IBASE digital signage players with Acer Cloud Technology's software device management platform provide users and signage vendors with cost savings, stability and efficiency of performance through automatic software provisioning, remote hardware monitoring, and remote troubleshooting in digital signage applications.

"IBASE has developed cloud solutions by leveraging IBASE signage platforms unique technologies' built-in hardware EDID (extended display identification data) that prevents screen convergence problems due to cable disconnection or failure to identify EDID, as well as the iSMART and Observer featuring automatic power on/off scheduling, automatic power recovery, low temperature boot protection, and monitoring of system temperature, voltage and fan speed," said Archer Chien, Director of Solution Product Planning Dept. at IBASE. "By bundling Acer's Being Device Management, we can offer fully integrated solutions that centralize the control and management of systems to improve operation efficiency and deal with ongoing costs associated with operating a digital signage network."

Acer Cloud Technology will be supporting IBASE at this year's ISE exhibition in RAI Amsterdam to promote BDM-preloaded digital signage players. You are invited to visit IBASE's booth 8-C223 at Hall 8. Please visit www.ibase.com.tw for more information.

About IBASE Technology

IBASE Technology (TPEX: 8050) specializes in the design and manufacturing of robust industrial PC products, delivering high quality products and excellent service since its establishment in 2000. IBASE carries out manufacturing and quality control at its own facilities in Taiwan that are certified with ISO 9001, ISO 13485 and ISO 14001 standards. Current product offerings comprise of x86- and RISC-based industrial motherboards, embedded systems, panel PCs, digital signage players and network appliances for applications in the automation, retail, transportation, gaming, healthcare and smart factory sectors.
